2019 Belmont Primary School iPad Program

5/6 Area Required Apps - Term 1

Attached are the required iPad apps for Term 1, 2019. At this stage, the apps have not changed since the end of last year. We would appreciate it if you could do a check to make sure that you have the current apps, as these are the ones we will be using in Term 1.
Other than the steps for the first app (below), all you have to do is scan the QR code to download the relevant app!

STEP 1

Download the first app which is called "QR Code Reader by Scan". Once it is installed, you can use it to scan the supplied codes to go directly to the preffered app and its download point.

To do this:

1. Open your app store and search for "QR Code Reader".
2. The image below should show the first and correct option, from a company called Scan.
3. Tap on it and select download.

QR Code Reader
by Scan
Utilities

+ Get ⌄

STEP 2

Once this has been done, you can use this app to scan the QR codes to access the exact apps we are looking for.

To do this:

1. Scan QR code
2. Download the app!

Over the past 2 years, we have explored many apps that support a range of learning tasks and curriculum areas. Up until now, all of the apps we have required have been free apps. This will continue in 2019 however we may be adding some paid apps to our list this year. The cost for these apps will be around $20. There will be more information about this throughout the year.

	Price: Free	**Google Classroom** Students join an online classroom allowing teaching staff to distribute learning resources.
	Price: Free	**Google Drive** Students each have a secure, cloud based storage for saving and sharing work.
